On the June 21 Election Day CFFESD will deploy 1000 stationary observers to 1000 Voting Centers. CFFESD will be present at the Voting Centers from the beginning of the opening procedures until the end of the closing procedures. Selected Voting Centers represent statistically representative sample on the level of Albania, as well as of Tirana, Shkoder and Durres. In addition, CFFESD will cover the entire municipality of Himare. Information from the observers will be collected through the Tirana based call-center and efforts of 35 operators. Data will be collected via SMS and phone calls in a especially designed database. All CFFESD observers went through three levels of testing.

CFFESD will continue monitoring counting processes at the Ballot Counting Centers and, depending of the quality of the process, will decide whether will inform public about its findings only in its final report or earlier in the process.

CFFESD observation effort is supported by United States Agency for International Development (USAID) through Assist Impact and with technical assistance from National Democratic Institute (NDI).
